

Hand painted memory boxes for all your cherished keepsakes...since 1997

HR 4040: Consumer Product Safety Improvement Act of 2008

Stacie Dale Designs Inc., baby and child keepsake chests and keepsake boxes are not intended for use by children under age 12, rather, they are intended for parents to keep and preserve their child's special mementos. Our keepsake chests are not intended for use as toy chests and are not advertised, marketed, or sold as toy chests.

The Consumer Product Safety Commission passed law HR 4040, CPSIA, in 2008 to make mandatory all companies who produce children's products (toys, furniture, clothing, baby care items) to test their products for harmful substances (lead and *phthalates *found in plastic & vinyl). While we do not sell products for use by children, we do test our products for lead at a CPSC accredited testing facility and make available the name and contact information of our manufacturers. You will find that information below along with other pertinent testing information. Our keepsake chests are manufactured from 100% poplar wood in China and are also tested in China at a Chinese testing agency before importation to the United States. Our smaller keepsake boxes are manufactured in Philadelphia, Pennsylvania. Both products are again tested here at Chemical Solutions Ltd. in Mechanicsburg, Pennsylvania for acceptable lead content. We are committed to providing you with a quality product that is lead-free and will last a lifetime or more. You can learn more about the CPSIA law by visiting http://nsf.org/business/toy_testing/CPSIA.pdf
